

12th Air Force, 57th Bombardment Wing
321st Bombardment Group
Saturday, 1 August 1942 thru Sunday, 31 January 1943

*For my dad,
Colonel John "Jack" Fitzgerald, U. S. Army (retired)*

*"Lil Butch"
John T. Fitzgerald, SMSgt, U. S. Air Force (retired)*

12th Air Force, 57th Bombardment Wing (M)
321st Bombardment Group (M)
Saturday, 1 August 1942 thru Sunday, 31 January 1943

The following is a compilation of the 321st Bomb Group's Headquarters and individual Squadron War Diaries. They have been transcribed word for word, from the Squadron Histories provided by the Air Force Historical Research Agency (AFHRA), Maxwell Air Force Base Alabama. At the end of each Squadron's daily entry, the individuals cited in the entry are identified by *full name, rank and duty*, in alphabetical order. The day's entry begins with the Tactical Operations Statement, from the United States Army Air Forces (USAAF) Chronology, for the Mediterranean Theater of Operations (MTO). The history also includes mission reports, mission crew rosters, Missing Air Crew Reports (MACR), personal mission logs, journals, and diaries made available by various sources.

Invitation

Anyone who has documentation pertaining to the 321st Bomb Group or its members, and would like to have it included in this history, is welcome to participate. Copies of: photos (official or personal); orders (promotion, decoration, travel, etc.); Mission Reports; Missing Air Crew Reports; personal diaries, logs, journals, etc; other documentation; or information that will help identify hi-lited individuals will be greatly appreciated, as one of my goals is to correctly identify every man and plane assigned to the 321st Bomb Group.

My only interest in this project is to honor those who served by perpetuating their story, and making it available for future generations, particularly the families and friends of our Great Heroes. If you are interested in helping, or if I may be of assistance in finding information about your 321st BG Hero, please contact me at: Lil-Butch@nc.rr.com

Special Thanks to Very Special Folks

Friday, 26 June 1942

Barksdale Field, Louisiana:

HQ, 321st Bombardment Group: The 321st Bombardment Group (Medium) was constituted and made active, but without personnel, at Barksdale Field, Louisiana on June 26, 1942 pursuant to a letter from the War Department. The 321st Bombardment Group (Medium) has no other history. By the authority delegated to the Quartermaster General by the Adjutant General's Office, the coat-of-arms, described below, has been approved for the 321st Bombardment Group (Medium).

Blazonry:

SHIELD: Azure, six drop bombs, three, two and one.

MOTTO: Perseverance, Vision and Duty.

SIGNIFICANCE: In the ultra-marine blue and gold of the Air Forces, the bombardment functions of the group are symbolized by the falling bombs arranged three, two and one; the numerical designation of the group. The Motto: Perseverance, Vision and Duty, is expressive of the tasks performed by the group.

Saturday, 1 August thru Monday, 30 November 1942

Columbia Army Air Field, South Carolina:

HQ 321st BG War Diary: The 321st Bombardment Group (Medium) consisting of a Command Section and the 445th, 446th, 447th, and 448th Bombardment Squadrons, was activated with personnel at Columbia, Army Air Base at Columbia, South Carolina, on August 1, 1942. The original cadre of Command Section consisted of Major Charles T. Olmstead, Lieut. Albert R. Bell, Lieut. Posey T. Harris, Lieut. Walter Lund, Warrant Officer Edgar F. Ulmer and seven enlisted men with Technical Sgt. Leo W. McCann as Sergeant Major. Colonel William C. Mills assumed command of the group on August 3, 1942.

Bell, Albert R., 2Lt, pilot

Harris, Posey T., 2Lt, bombardier, navigator

Lund, Walter (NMI), 2Lt, engineering

McCann, Leo W., T/Sgt, Sergeant Major

Mills, William Courtney, Col, Commander

Olmsted, Charles T., Maj, pilot

Ulmer, Edgar F. "Tiger", CWO, Adjutant

The original cadre of the 445th Bombardment Squadron consisted of one officer and thirty-two enlisted men, with 1st Lieut. William V. MacFarlane, Squadron commander and Staff Sgt. Charles R. Pool as Acting First Sergeant.

MacFarlane, William V., 1Lt, pilot, Commander, 445th BS

Pool, Charles R., S/Sgt, 1st Sgt, 445th BS

A like number of enlisted men and one officer constituted the original cadre of the 446th Bombardment Squadron, 1st Lieut. Charles T. Ceronsky as Squadron Commander and Billy Dykes as First Sergeant.

Ceronsky, Charles T., 1Lt, Commander, 446th BS

Dykes, Billy (NMI), S/Sgt, gunner, 1st Sgt, 446th BS

1st Lieut. Clayton H. Heinlen, Squadron Commander; Staff Sgt. Glenn L. Ratliff, First Sergeant; and thirty-one enlisted men constituted the 447th Bombardment Squadron.

Heinlen, Clayton H., 1Lt, pilot, Commander, 447th BS

Ratliff, Glenn L., S/Sgt, 1st Sgt, 447th BS

1st Lieut. James P. Bates assumed command of the 448th Bombardment Squadron with Staff Sgt. Murray Asch as First Sergeant. Thirty-two enlisted men were in the original cadre.

Asch, Murray (NMI), S/Sgt, 1st Sgt, 448th BS

Bates, James P., 1Lt, pilot, Commander, 448th BS

The 321st Bombardment Group (Medium) was first located in a mess-hall, with Group Headquarters at one end and the four squadrons in the other end. The former boasted a Frigidaire stocked with cokes by optimists who later found them missing and the latter place was as congested as Times Square at five o'clock, busy with interviews, T/Os, Morning Reports, OCS aspirants, would-be non-coms, a little idle chatter and rumors. The congestion, at least, was taken care of when Group Headquarters moved up to its offices on the line and the squadrons moved into Tent City vacated by the 310th Bombardment Group.

Saturday, 1 August thru Monday, 30 November 1942
Columbia Army Air Field, South Carolina:

The Columbia Army Air Base at Columbia, S. C., was still under construction when the Group was activated on August 1, 1942. The Post Theatre was completed but was not ready for use during our stay.

Barracks were being built, but the majority of personnel at the base slept in pyramidal tents reinforced with wooden side-walls. The scene was taken outside of the 447th Squadron's Orderly Room.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

Immense portable hangars were used for servicing and repairing planes away from the hot sun.

On August 9th, thirty-six second lieutenants fresh from OCS and proud of their shiny gold-bars breezed into Headquarters and received their assignments; four to Command Section and eight to each of the four squadrons. Second Lieut. Ernest M. Gutman was appointed Adjutant of the 445th Squadron, and Second Lieut. John Javornisky, Second Lieut. Myron Gale and Second Lieut. Arthur Knievel, were the Adjutants of the 446th, 447th and 448th Squadrons, respectively.

Gale, Myron, 2Lt, Adjutant, 447th BS

Gutman, Ernest M, 2Lt, Adjutant, 445th BS

Javornisky, John, Jr., 2Lt, Adjutant, 446th BS

Knievel, Arthur W., 2Lt, Adjutant, 448th BS

Officers and enlisted men continued to arrive in large numbers from OCS, flying schools, bombardier schools, Air Corps Technical schools and Replacement Centers. Lieut. Gaffney was assigned duties of Athletic Officer in the 447th Squadron and Lieut. Huchingson was appointed Personnel Officer of the same squadron. Lieut. Neprash, Lieut. Holloway and Lieut. "Two-Gun" Evans, were appointed Intelligence Officer, Transportation Officer and Communications Officer, respectively. Lieuts. Farrens, Gaffney, Greiff, Zakar, Lichtward, Marrich, Meiners, Wallnau and Hayes, were assigned duties of a similar nature in the 448th Squadron.

Gaffney, Charles, H., 2Lt, Athletic Officer, 447th BS

Huchingson, Lee F., 2Lt, Personnel Officer, 447th BS

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

Neprash, Sergius P. 2Lt, Intelligence Officer, 447th BS
Holloway, McGlon T., 2Lt, Transportation Officer, 447th BS
Evans, James H. "Two-Guns", 2Lt, Intelligence Officer, 447th BS
Farrens, Kenneth L., 2Lt, intelligence, 448th BS (went to 380th BS?)
Greiff, Stanley (NMI), 2Lt, intelligence? 448th BS
Zakar, 2Lt, 448th BS
Lichtward, Frederick W., 2Lt, intelligence? 448th BS
Marrich, Martin K., 2Lt, adjutant? 448th BS
Meiners, 2Lt, Supply/mess, 448th BS
Wallnau, Carl N., Jr., 2Lt, engineering? 448th BS
Hayes, Elzie N., Jr., 2Lt, armament?, 448th BS

As new men reported in, they were interviewed as to past training in Air Corps Technical Schools, past experience in civilian life and classified in such a way that their talents would be put to the best use. The best-qualified men were sent to OTU Schools at the Columbia Army Air Base and were shortly thereafter promoted.

On August 12, 1942, Major Francis R. Pemberton arrived from Headquarters Air Intelligence School, Harrisburg, Pa., and was appointed Group Adjutant and Warrant Officer E.F. Ulmer, was made Assistant Adjutant in addition to his duties as Personnel Officer. First Lieut. Charles R. McMechen, dental corps, arrived the same day to perform duties of Group Dental Officer. Earlier in the month, Second Lt. Arnold H. Schwab was appointed Group Statistical Officer. Capt. Robert R. Pinger, Medical Corps, was appointed Group Surgeon on August 16, 1942.

McMechen, Charles R., 1Lt, Group Dental Officer
Pemberton, Francis R., Maj, intelligence, Group Adjutant
Pinger, Robert R., Capt, Group Surgeon
Schwab, Arnold H., 2Lt, Group Statistical Officer
Ulmer, Edgar F. "Tiger", CWO, Personnel Officer, Group Asst Adjutant

The 445th Bombardment Squadron came out first in the first formal inspection of the group on Saturday, August 22, 1942. Their squadron strength on September 1, 1942 was fifty-two officers and two hundred and seventy-one enlisted men. Second Lieut. Henry B. Garland and Priv. Bernard Burton of the 445th Bombardment Squadron were in a plane crash in which Priv. Burton rescued all of the members of the crew. No one sustained permanent injuries.

Burton, Bernard A., Pvt, gunner, photographer, 445th BS
Garland, Henry B., 2Lt, pilot, 445th BS

The 447th Bombardment Squadron spent a few anxious hours when they heard that Lieut. DeMoss' plane had crashed just outside of Greenville, South Carolina. The entire crew had parachuted to safety, however, and the extent of injuries sustained, were a sprained ankle of Lieut. Morganti and a head-bruise for Sgt. Whitaker. No sooner had this excitement died down, when Lieuts. Vangness and Urquhart were killed in an early morning flight in a plane of the 309th Bombardment Group, also of Columbia Army Air

Things were getting pretty well organized and shaped up for the second phase of OTU training at the end of August. Second Lieut. Ilg, Assistant Group Materiel Officer, was at Middleton Air Depot, Middleton, Pa., for the purpose of assuring a satisfactory flow of supplies. On September 1, 1942, Chaplain (1st Lieut.) E.V. Johnson joined the group and assumed duties of Group Chaplain, relieving Chaplain William Williams. About the same time, Lieut. Moon, Group Communications Officer, was passing out the cigars (no, it wasn't a boy) on his recent promotion to first lieutenant. And there were rumors that we were going to leave Columbia Army Air Base soon.

Ilg, Joseph M., Jr., 2Lt, personal equipment Johnson, E. V. (i.o.), 1Lt, Chaplain
Moon, Gerald T., 1Lt, communications Williams, William (NMI), 1Lt, Chaplain

Sgt. Kenneth D. Terhune was promoted to grade of First Sergeant on September 13, 1942 and took over those duties common to a "topkick", in the 445th Squadron. First Lieut. William V. MacFarlane, Squadron Commander of the same organization, was promoted to rank of Captain on the next day. Second Lieut. Ernest L. Smith was appointed Squadron Ordnance Officer and Second Lieut. John E. Kelly took over the duties of Squadron Communications Officer.

Kelly, John E., Capt, Communication Officer, 445th BS
MacFarlane, William V., Capt, pilot, Commander, 445th BS
Smith, Ernest L., 2Lt, Ordnance Officer, 445th BS
Terhune, Kenneth D., Sgt, operations, 1st Sgt, 445th BS

On September 9th, First Lieut. Ceronsky was assigned the duties of Squadron Operations Officer in the 446th Squadron, succeeding Lieut. Griffith. Capt. Henry H. Schwane assumed command of the squadron.

Ceronsky, Charles T., 1Lt, Operations Officer, 446th BS
Griffith, Frank J. "Grif", Capt, pilot, 446th BS
Schwane, Henry H., Capt, pilot, Commander

First Lieut. Heinlen was transferred to Group Operations and Capt. Raymond D. Sampson assumed command of the 447th Bombardment Squadron on September 8, 1942.

Heinlen, Clayton H., 1Lt, pilot, operations
Sampson, Raymond D., Capt, pilot, Commander

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

On September 14th, Major Bailey C. Cook joined the group and was assigned the duties of Group Operations Officer. Major Charles T. Olmsted was assigned primary duties of Group Executive Officer.

Cook, Bailey C., Maj, pilot, Group Operations Officer

Olmsted, Charles T., Maj, pilot, Group Executive Officer

445th Bombardment Squadron: The 445th Squadron was activated at the Columbia Army Air Base on August 1, 1942 as part of the 321st Bomb. Group (M). However, the Squadron did not function as an independent organization until the Group moved to the Walterboro Air Base on September 20.

1st Lt. William V. MacFarlane was the first Commanding Officer. 2nd Lt. Richard P. Tipton was appointed Operations Officer. At Columbia the personnel of the Squadron gradually reported from replacement centers or from the various training schools. The men coming together in this new Squadron represented a cross-section of America. They came from all walks of life. For example, one navigator reported who had been a theatre manager in Illinois. A pilot reported who had been a grocery clerk in New York. A radio operator reported who had been a miner in West Virginia. There was a pilot who had been a dress cutter in Georgia. One of the radio gunners had been a florist in Massachusetts. A pilot reported who had been a bank clerk in Mississippi. There was one bombardier who was formerly an insurance salesman in the state of New Jersey. There was a navigator who reported that he had been a school teacher in Kentucky; a radio operator who was a bartender in Ohio; an aerial engineer who was a truck driver in Texas; and a radio gunner who was a violinist in Ohio.

MacFarlane, William V., 1Lt, pilot, Commander

Tipton, Richard P. "Tip", 2Lt, pilot, Operations Officer

Such was the background of the men who were coming together to create one unit in the unfolding organization, later to be referred to as American Air Power.

As might have been expected, there were difficult and trying days in Columbia. The expansion of the Air Forces at this time was so rapid and the organization which was existing at the outset of the war was so small that well ordered efficiency could hardly be expected at once. In any event the men complained a great deal about the food, the living quarters, the sanitary facilities and the lack of orderly administration in general.

At this stage the Squadron had only two aircraft, one of which was not in first rate condition. The 445th was attached to a base squadron for operational purposes. The pilots did a great deal of flying. Sometimes they flew in the morning, the afternoon and also the night. The inexperienced pilots were given instruction and were checked out.

There were some crashes with the crews being killed. These accidents had, of course, a bad effect on the morale of the men. However, for the main part, they took it with the philosophic attitude of "this is war". It was difficult if not impossible in most cases to determine the cause of the crash. Thus it often remained an unanswered question as to whether it was a defective plane or merely improper handling of the ship.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

The pilots worked hard and gave their best despite the difficulties encountered in these early days. The instructor-pilots were: Lt. Richard P. Tipton, Lt. Robert M. Bonus, Lt. William S. Cratin and Lt. Wayne C. Clinton. These men had a serious responsibility and worked hard at their job. This was the formative stage of future combat pilots and the job which was done by the instructor-pilots is indicated by the record which the men later attained in combat.

Bonus, Robert M., 2Lt, pilot
Cratin, William S., 2Lt, pilot

Clinton, Wayne C., 2Lt, pilot
Tipton, Richard P. "Tip", 2Lt, pilot

If a history of any military unit is to be of any value, it should provide information which will help make for improvement in the future. And so it should be recorded that a great deal of the difficulties in these early days was administrative and organizational. In civilian life great value is attached to an able administrator or organizer or in other words an able executive. There is no doubt that every possible emphasis in selection and training should be placed on the importance of administration and organization.

445th BS: *War Diary of: Seegmiller, Barnard H., Sgt, armament:*
09/06/42: *Sunday*

"It is difficult for me to realize today is Sunday, it has been so much like any other day. In fact I have almost failed to keep count of the days since I came to Colombia Army Air Base. September 1, I came from Daniel Field to this place (CAAB) and the following day was assigned to the 309th Bomb Group and two days later to the 377th Bomb Squadron. Our squadron is normally composed of sixteen B-25 airplanes, but at present there are only eight.

The week I have been here has been the most provoking of any since I came in the army. When I got to a squadron at last, and became assigned, I expected to begin being useful to the cause. I found, however, that we new men are almost entirely ignored. It is no concern of anyone's whether we do anything or not and we seem expected to fall quietly into the practice of going out on the line each day and doing nothing but sit there. That, I find, is very boring. I have tried to busy myself with whatever I could find, but it has not proven very satisfying and the result is that I have wondered a great deal whether I am as contented here as I have thought I was. I saw a piece of rope today and it reminded me of how Dad used to go uptown and come back with a clean shave, a new pair of overalls and a coil of new rope in his hand with which he was to tie up a bronco. Those were grand days and I miss Dad as much almost as I admire him.

I took my second airplane ride this afternoon, (my first one was a little more than a year ago over Provo, with Gladys). I went on a practice-bombing mission and we stayed up a little more than an hour. I was in the rear of the plane all to myself and tried out every position from tail gunner to upper turret and radio operator. It was a very interesting experience and greatly revived my desire to fly. What I wouldn't give for 20-20 vision! The South Carolina countryside is beautiful from the ground, but from above the patchwork of forest, fields, streams and lakes, criss-crossed by winding roads and stately highways, is one of the most pleasant and peaceful scenes I have ever beheld."

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

446th Bombardment Squadron: No Entry

447th Bombardment Squadron: On August 1, 1942 in one corner of a mess hall at the Columbia Army Air Base the 447th Bombardment Squadron officially came into existence. It was one of four squadrons making up the 321st Bomb. Group which was activated on that date.

Thirty-one enlisted men under the command of Lt. Clayton H. Heinlen made up the cadre around which the squadron was to be built. There was no equipment other than the personal belongings of the men making up the first cadre and this small group of men started from scratch.

Heinlen, Clayton H., 1Lt, pilot, Commander

In about a week ground officers and flight officers began to arrive. Lt. Myron Gale was appointed adjutant. During the first month of its existence the squadron gradually began to take shape as it approached full strength in personnel. Supplies consigned to the squadron began to trickle in and we got a few airplanes.

Gale, Myron, 2Lt, Adjutant

As soon as the new men arrived they were assigned to jobs for which they had been previously trained or for which they were best suited. O.T.U. training got under way right away and classes were held for instruction in all types of work which the men would be required to do in the squadron.

Lack of experienced personnel was responsible for most of the confusion which occurred during those early days but as the men worked at their various jobs and became familiar with their work, most of the hitches were eliminated and the squadron began to function smoothly.

The O.T.U. training program was intensified during the latter part of August and throughout September. More planes were assigned to the squadron and the flight crews were given training in operating their planes under every possible condition. Night flights as well as day flights were made and these flights served to give additional training to the navigators and other crew members as well as the pilots and co-pilots. One by one the new pilots were checked out in the B-25.

Not all the new men who came into the squadron turned out to be satisfactory and from time to time some were transferred out. An effort was made by this process of elimination to retain in the squadron only the best men.

There were quite a few plane accidents while the squadron was at Columbia but this squadron did not lose any planes there. Two flight officers of the squadron were killed in a crash however during the early part of September. They were flying a 309th plane when the crash occurred.

At Columbia the enlisted men of the squadron were quartered in tents. These tents had wooden floors, electric lights, and did not make bad living quarters. The officers were quartered in wooden barracks – little better than the tents since they were not heated and had very crude windows.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

The city of Columbia was a nice southern city but its facilities were greatly overtaxed by the large number of soldiers stationed near it – the largest number being at Ft. Jackson. It was almost always necessary to stand in line for movies, although there were four or five theatres in town; and all the restaurants were overcrowded at meal time. The squadron was pretty much restricted during the early days of the O.T.U. program and the men didn't get into town very often.

On the base at Columbia there was an Officers Club which was nothing more than a glorified barracks building. There was a bar, however, and sandwiches and drinks were sold. A more elaborate club was opened later in the city of Columbia for the officers.

The group's first phase of O.T.U. training was completed about the middle of September. On September 8, 1942 Capt. Raymond D. Sampson took over command of the squadron replacing Lt. Clayton H. Heinlen who was made squadron operations officer. The squadron was ready to begin its second phase of training and was only waiting for the 310th Bomb Group to move out from the Walterboro Army Air Base so that it could be occupied by the 321st Bomb Group.

Heinlen, Clayton H., 1Lt, pilot, Operations Officer

Sampson, Raymond D., Capt, pilot, Commander

447th BS War Diary: August 1943 (prepared by 2Lt. McGlon T. Holloway, Transportation Officer)

Day 1 We were activated today. Our commanding officer, Lt. Clayton Heinlen, and 31 enlisted men form the nucleus around which we hope to build a combat squadron -- one of four which make up the 321st Bomb Group. The squadron at this point has one corner of a mess hall at the Columbia Army Air Base for its home. The enlisted men are living in tents in the 309th Bomb Group area. The squadron has nothing much to go on but its plans on paper.

Heinlen, Clayton H., 1Lt, pilot, Commander

Day 2 Morning reports and squadron records were begun today. No one seems to know much about the proper procedures and this caused quite a bit of confusion.

Day 3 Plans are being outlined for an OUT training program to begin when new personnel arrives. Lt. Eugene Herrmann, Engineering Officer, was assigned to the squadron today. He was the first of the squadron officers to arrive.

Herrmann, Eugene R., 1Lt, engineering

Day 4-8 Usual garrison duties.

Day 9 The squadron had eight administrative officers assigned today. These officers were fresh from OCS. Also flight officers from schools all over the country began to arrive and some were assigned to our squadron. The job of classification was begun and job assignments followed.

Day 10 Additional flight and ground personnel was assigned to the squadron. We also got three airplanes. Our squadron moved into the tent area which had just been vacated by the 310th Bomb Group.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

Day 11 The OUT training program was started. The program entailed intensive ground training in its first phase. Schedules were set up and classes held throughout the entire day.

Day 12 Training continued.

Day 13 Two of our planes were damaged today. One was running up the engines when the left brake came off. The plane swung around, the wing clipping the other plane.

Day 14 Training continued.

Day 15 More and more ground and flight personnel was assigned to the squadron from day to day. The supply problem is acute and our greatest difficulty now. There are only four vehicles in the group for transportation and this also is a problem. The squadron is beginning to take form however as we approach full strength in personnel.

Day 16 Training continued.

Day 17 The first squadron vehicles came in today. Six jeeps, 1 command car, 1 2½ ton truck, 1 recon. Car, and 9 trailers made up the first group. This was a very welcome addition to the squadron's equipment.

Day 18-27 Training continued.

Day 28 Two of our officers were killed tonight when they crashed in a 309th plane. The plane was coming in for a landing and landed short of the runway in a clump of trees. The men were killed instantly and the plane completely destroyed. (*According to the Death Certificates, this incident actually occurred on 13 Sep 42*)

Urquhart, Donald V., 2Lt, pilot

Vangness, Martin O., 2Lt, pilot

Day 29-31 Training continued.

447th Bombardment Squadron Special Account: September 10, 1942: Our Squadron's social life made an auspicious start with our first party which was held at the Elk's Club in Columbia. Men brought dates but those who didn't found ample company with the unescorted girls who had been invited. The main attractions were a large outdoor dance floor, 10-piece band and free refreshments. Our then Group Commanding Officer, Col. Mills, gave a short talk wishing us luck and Godspeed in what was to come. The affair broke up with good timing when the beer ran out at 11:30.

Mills, William Courtney, Col, Commander (Aug 42)

Note: According to the HQ 321st BG war diary, the following two incidents both occurred on the same night. Lt DeMoss's ship crashed first, then shortly thereafter, the 309th BG ship crashed. According to Death Certificates, the incidents occurred on 13 September 1942, rather than as dated in 447th BS Special Accounts.

447th Bombardment Squadron Special Account: September 3, 1942 (Actually occurred 13 Sep 42): The O.D. was awakened at 2:30 A.M. with the news that one of our planes had crashed near a road just outside of Greenville, S. C. The news was phoned in by Lt. John Colby, navigator on the flight, who bailed out before the crash. He

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

added that the other members of our Squadron in the plane had also successfully jumped. They were Lt. Jack DeMoss, pilot; Lt. Clyde J. Morganti, co-pilot; and S/Sgt. Michael Galich, engineer. It seems that they had run into some navigational difficulties and were forced to abandon ship due to lack of gas. Lt. Morganti sustained the only injury – a sprained ankle. The men who had jumped straggled in all morning with stories of how they landed in trees, marshes, and on farm houses. Their membership fee for the Caterpillar Club was expensive to Lts. DeMoss and Colby since they each had to pay \$112.50 in damages for the plane to the Government.

447th BS A/C No. unknown - crashed 13 Sep 42 - no serious injuries

P *DeMoss, Jack M., 2Lt, 447th BS*
CP *Morganti, Clyde J., 2Lt, 447th BS*
N *Colby, John W., 2Lt, 447th BS*
E *Galich, Michael M., S/Sgt, 447th BS*
E *Whittaker, William H., Sgt, 445th BS*

447th Bombardment Squadron Special Account: August 28, 1942 (*Actually occurred on 13 Sep 42, according to the Death Certificates*): This date we had our first and only casualties of the training period. Going along as co-pilots with a 309th Bombardment Group plane and pilot, Lts. Urquhart and Vangsness were killed instantly when their plane crashed one quarter mile from the runway at 5:30 in the morning. Fog had a great deal to do with the accident.

309th BG A/C No. unknown - crashed 13 Sep 42 - entire crew killed.

P *Attridge, James F., Jr., 1Lt, 309th BG*
CP *Urquhart, Donald V., 2Lt, 447th BS*

G *Gallie, Leon O., Pvt, 309th BG*

447th BS War Diary: September 1942 (*prepared by 2Lt. McGlone T. Holloway, Transportation Officer*)

Day 1-2 Training continued.

Day 3 Lt. DeMoss and crew on a training flight ran out of gas. All the men bailed out and survived both the plane was lost.

Day 4-7 Training continued.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Columbia Army Air Field, South Carolina (continued)

Day 8 Capt. Raymond D. Sampson assumed command of the squadron today replacing Lt. Clayton H. Heinlen. Lt. Heinlen has been made squadron Operations Officer. Day and night flight training is being intensified.

Heinlen, Clayton H., 1Lt, pilot, Commander

Sampson, Raymond D. "Sammy", Capt, pilot, Commander

Day 9-14 Training continued.

Day 15 Lt. Clayton H. Heinlen was transferred to Group headquarters where he will take over duties as Assistant Group Operations Officer.

Heinlen, Clayton H., 1Lt, pilot, Operations Officer

Day 16-17 Training continued.

Day 12 Training continued.

Day 18 Today we moved to Walterboro Army Air Base for our second phase of OUT training. The move was accomplished by truck and plane. We had been told to expect the worse and were quite surprised to find that there were heated barracks and mess halls at our new base and that in many respects it is a much better location than Columbia. The sections on the line are in tents. Walterboro is a charming little southern city and the people very friendly. We are to go through the final phase of our OUT training program here.

18 Sep thru 31 Oct: During this period ground and flight OUT training progressed. Practice bombing was carried out using the bombing range at Myrtle Beach. The flight echelon went to Eglin Field, Fla. To learn skip bombing and torpedo bombing. They remained there two weeks and then returned to Walterboro.

448th Bombardment Squadron: 1st Lieutenant James P. Bates gazed across the sun baked field at Columbia Army Air Base to a small group of men who were awaiting his first orders. Thirty-two men and one Officer were the entire personnel of the 448th Bomb Squadron (M), on that hot August afternoon. By authority contained in General Order number 143 Headquarters, Third Air Force, Tampa, Florida, dated June 23, 1942, the Army Air Force had created the 321st Bomb Group (M), and its member squadrons housed in a single Mess Hall with each squadron occupying a corner as a combination Orderly Room, Operations Office, Engineering Office, etc, the 321st Bomb Group had little to offer to strike terror into the hearts of the Axis partners. Even the few airplanes which it could call its own were borrowed from the 309th Bomb Group. Anyone entering his tar paper shack at any time during the first few days of the Squadron's existence would have been hard put to find the least semblance of order in that bedlam, yet the infant organization was making progress.

Bates, James P., 1Lt, pilot, Commander

The first week of its existence ended with the 448th remaining little more than a figment of the imagination of Lt. Bates. A typewriter, a small table and a wooden bench was the total worldly goods of the organization. Meanwhile one ground officer Lt.

Saturday, 1 August thru Monday, 30 November 1942 (continued)

Columbia Army Air Field, South Carolina (continued)

Wallnau and several more men reported for duty. Immediately the Officer was given the job of Engineering Officer, Adjutant, Operations Officer, etc.

Bates, James P., 1Lt, pilot, Commander *Wallnau, Carl N., Jr., 2Lt, engineering*

This state of affairs ended on August 8 when 8 ground Officers fresh from O.C.S. Miami Beach, Florida reported for duty. They were given the job of administering the various sections of the squadron. Lt. Bates, aided by Lts: McCurry, Fisher, Veum and others soon had his hands full instructing, training and qualifying the new pilots who were at this time pouring into the new organization. Most of the latter had never seen a B-25.

Bates, James P., 1Lt, pilot, Commander *Fisher, James Buckner, Jr., 2Lt, pilot*
McCurry, Milton L., 2Lt, pilot *Veum, Ole E., 2Lt, pilot*

Enlisted Men too were coming in and Lt. Kneivel, the Adjutant found his hands full straightening out Service Records and pay data. Lt. Greiff was endeavoring to put each man into the position he most wanted and still fill the squadron's table of organization. Lt. Marrich was chasing both men and Officers to O.T.U. school and Lt. Farrens was busy instilling basic rifle technique into all the interested men. Lts: Jantz and Meiners were setting up their supply and mess facilities and Lt. Lichtward, while investigating Enlisted Bombardiers, was setting up the Intelligence Section. Everyone was exceedingly busy and gallons of mid-night oil were burned in the effort of achieving a smooth running organization. The crowded conditions lasted a week while the 310th Bomb Group moved its personnel and equipment to Walterboro, then the 448th moved in to quarters that had been recently occupied by the 426 Bomb Squadron. At the end of a long row of pyramidal tents were two reserved for the Orderly Room and one for the Supply. The men slept four in a tent, and with board flooring the warm weather of South Carolina and little rain everyone was fairly comfortable. The Officers slept in two-man tents and barracks across the ravine from the main camp.

Farrens, Kenneth L., 2Lt, intelligence *Greiff, Stanley (NMI), 2Lt, intelligence*
Jantz, Lawrence E., 2Lt, supply *Kneivel, Arthur W., 2Lt, Adjutant*
Lichtward, Frederick W., 2Lt, intelligence *Marrich, Martin K., 2Lt, adjutant*
Meiners, 2Lt, supply/mess

The line was set up on the far side of the field and Lt. Wallnau was kept continually busy securing equipment and supplies as they came into the Columbia Railroad Yards. Much maintenance work was also necessary on the three airplanes then in the squadron's possession.

Wallnau, Carl N., Jr., 2Lt, engineering

Columbia Army Air Base was at this time a collection of sites where eventually very adequate buildings would be erected by at that time only temporary tar paper shacks greeted the eye.

The squadron was soon hard at work on a very active program. All new pilots had to be checked out, ground crews trained and bombardiers and navigators given experience in the B-25. Meanwhile everyone had to be in tip top physical condition. Every morning calisthenics for both officers and enlisted men were on the schedule of the seven day week. Yet all the time through those first months men kept pouring in.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina

More and more equipment made its appearance and men who had not received pay for several months were brought up to date. Everyone settled down into the pattern of the squadron routine. Lt. Gaffney the squadron recreation officer outfitted a day room and arranged for many dances and parties in Columbia. Everyone believed that the 448th was well on the way to becoming the best squadron in the Group.

Gaffney, Charles, H., 2Lt, Adjutant

First phase O.T.U. training was nearing completion, most of the crews checked out in the B-25's and everyone was looking forward to the move to Walterboro, S.C., for the second phase of the training.

HQ 321st BG War Diary: The rumors that we were to leave Columbia finally did come true in our transfer to Army Air Base-Anderson Field, Walterboro, South Carolina, on September 17, 1942 by air and truck convoy. Contrary to the general conception that the next place to where one is going to move is always much better, the latrine specialists had really conjured some bad tales about Walterboro. So we went there expecting nothing less than the worst. But, we moved into stone barracks and quarters not in the least unpleasant. We also had plumbing that worked—sometimes. Walterboro is a pleasant little Southern village, not too far from Charleston, S.C. and many officers and enlisted men made pleasant acquaintances in our stay there of about ten weeks.

Upon transfer of the group to Walterboro, S.C., Colonel Robert D. Knapp, Director of the OTU Training Program at Columbia Army Air Base, Assumed command of the Group. Colonel William C. Mills transferred to the 340th Bombardment Group at Columbia Army Air Base and assumed command of that newly activated group. Capt. William A. Lowell, adjutant of the 309th Bombardment Group at Columbia Army Air Base, was relieved of his duties there and became Adjutant of our group. Lieut. Roger K. Lewis was appointed Assistant Adjutant and relieved of his duties as Group Adjutant.

Knapp, Robert Duane, Col, pilot, 321st BG Commander

Lewis, Roger K., 2Lt, Group Asst. Adjutant

Lowell, William A., Capt, Group Adjutant

Mills, William Courtney, Col, Commander

Officers and enlisted men continued to arrive in ever-increasing numbers to fill out the Tables of Organization. Enlisted men were being promoted just about every two weeks and we never could tell for sure, what grade a man was. Several men left the various squadrons to attend Officer Candidate Schools and Aviation Cadet Schools. Promotions of officers were initiated in all of the squadrons.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

At Walterboro Army Air Base, Walterboro, S. C., Group Headquarters was situated in a long double-winged building. It was easily recognized by its sawdust lawn and white railing.

The officers were quartered in newly constructed wooden barracks (above), and the enlisted men lived in stone barracks (below).

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

The later part of September and the first week or two in October, found the Flight Echelons of the various squadrons at Eglin Field, Florida, for Torpedo Bombing Training. While the air echelon was at Eglin Field, the ground echelon held the fort at Walterboro, doing KP, guard duty and administrative details.

On September 29th, Second Lieuts. Crites and Woodworth, Technical Sgt. Fortenberry, Staff Sgt. Calvo and Corporal StClair of the 448th Squadron, died as result of a fatal airplane accident while on detached service at Eglin Field, Fla.

October 9, 1942, was a tragic day for the 446th Squadron and the whole group. Two planes were lost in a routine flight within two hours of each other. The losses in one plane were Capt. Ceronsky, Second Lieut. McDonald and Staff Sgt. Poinson. In the other plane, we lost Second Lieut. Broyles, Second Lieut. Butler, Second Lieut. Bugra and Private 1st Class Young. Lieut. Bugra had just joined the squadron and, ironically, it was his first flight with the 446th. The causes for the crashes were not determined.

Who said that Friday the Thirteenth is unlucky? Friday, November 13th, was “Cigar Day” in the 446th and 448th Squadrons. Lieuts. Javornisky and Knievel, adjutants of the 446th and 448th Squadrons, respectively, are proudly displaying their silver bars. Three days later, our popular Group Adjutant, Capt. Lowell, was wearing his gold leaf. Lieut. Schwab of Command Section in Statistical Control was passing out some fine coronas on his promotion to first lieutenant.

Javornisky, John, Jr., 1Lt, Adjutant, 446th BS

Knievel, Arthur W., 1Lt, Adjutant, 448th BS

Lowell, William A., Maj, Group Adjutant

Schwab, Arnold H., 1Lt, Group Statistical Officer

Shortly after our transfer to Walterboro, S.C., Sergeant Vishy replaced Sergeant Ratliff as First Sergeant of the 447th Squadron. The 447th also got a new mess officer in Lieut. Gaffney.

Gaffney, Charles, H., 2Lt, Mess Officer

Ratliff, Glenn L., S/Sgt, personnel

Vishy, Joseph J., Jr., Sgt, personnel, 1st Sgt

445th Bombardment Squadron: Early in September word was received that the new air base under construction at Walterboro, South Carolina was ready for occupancy and that the 321st Group was to move there. The men looked forward to the change.

On September 20, the entire Squadron had arrived at its new base in Walterboro. At this time the Squadron had 9 B-25's with which to train. The field was exceptionally large for the accommodation of one Group and the dispersal of both aircraft and quarters was carried out at even greater distances than have been used in combat theatres. The distance between the orderly room (around which the enlisted men were quartered) and the Officer's barracks was about two miles and the distance from the orderly room to the Operations building on the line was nearly two miles further.

There was no Squadron Officers' mess, as the Officers' mess was operated on a Group basis. The enlisted men had their own mess.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

The nights and early mornings were damp and cold. Men who had lived in sub-zero weather said they had never felt the cold so much although the temperature seldom reached a freezing point.

A great deal of emphasis was placed on athletics and exercise. The various departments attempted to train their personnel. The pilots continued to do a large amount of flying. The S-2 Officer organized flights to simulate bombing missions and briefed and interrogated the crews going on such missions.

Reveille for the enlisted men was at 5:45. The practice flying started almost as soon as daylight permitted. There was an atmosphere of urgency greater than that which was later experienced in the combat zone.

The Squadron lost one plane and crew at Walterboro. Lt. Cole, the assistant Operations Officer took a plane up to swing the compass. He crashed in a swamp outside Charleston. One engine was seen to explode and break off the wing. It was found a considerable distance from the remainder of the wreckage. The S-2 Officer conducted an investigation and reported that the only reasonable explanation which was consistent with all the facts was that there might have been a leak in the oxygen tank which could have caused the kind of explosion which occurred, since if pure oxygen comes in contact with oil, an explosion will result.

Cole, Douglas (NMI), 2Lt, pilot

This explanation was supported by the fact that no fire accompanied the explosion.

In any event the oxygen was removed from all of the ships and there were no further accidents of this kind in the Group, although previously there had been several.

Odds and ends about Walterboro that will be recalled by the men are: the fire that burnt the Medical storage building to the ground; the delay in completing the water system; the welcome heat which was produced by the little belly stoves; the early morning fog that hung over the depressions on the way to the line in which a few men lost their way trying to find a particular place on the large field; the coca-cola bottles; the slot machines; the cross-country hikes which were promoted by Lt. Malek.

Malek, Stanley J., 2Lt, intelligence

Then there were the buses which, loaded to capacity, took the men into the town of Walterboro where a few restaurants, bars and girls held their lure. There were the meetings in which the men were "eaten out" for this and that. There were warnings about proper uniforms, proper saluting and proper military courtesy. There were classroom lectures and moving pictures on various subjects including aircraft identification, military security, buzz-bombing, evasive action, and camouflage. There were bombardiers protesting because they could not get more training on Norden sights and navigators who felt that they were not being given an opportunity to get enough experience in their particular field.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

There were the ever present rumors as to when the Group might be leaving for the combat zone and as to where it might go. There was the development of the new Army vocabulary, expanding the use of certain old words and improvising the use of new ones, not all of which could be used at the dinner table back home. There was a great deal of talk about sabotage and espionage – more than was afterward heard even in the combat zone.

Toward the end of November it was heard first through the usual latrine rumor that the Group was to move to the DeRidder Army Air Base in Louisiana and there participate in maneuvers. This temporarily put an end to the rumors that the unit was about to go overseas.

An advance party flew down to DeRidder to organize the layout. This base was more established than Walterboro. It had an attractive Officer's Club, a large hangar with a cement apron in front and a very desirable PX store with female clerks. There was a well established base organization. When the Squadron first moved into Walterboro, there was no base organization and it was operated as a sub base of Columbia.

445th BS: *War Diary of: Seegmiller, Barnard H., Sgt, armament:*

10/05/42: "Having worked a half shift this morning, we are resting this afternoon preparatory to going on an all night shift tonight. The weather is mild and pleasant and reminds me very much of October weather at home. Each morning as we fall out at five o'clock for roll call, I am reminded of the crisp, moonlight dawns of last fall's round-up and it reminds me very much of a desire I have and can't suppress to be there again this year and each successive year here after. I think I shall never get completely away from my longing for the range and to do the things Dad used to do (homesick perhaps).

This afternoon our Commanding Officer, Capt. MacFarlane, called us together to discuss a few topics relative to our leaving for Foreign Service. His remarks lent credence to the many rumors we have heard to the effect that we would soon be leaving the country, in a matter of two or three weeks. His admonitions were stated clearly and without affectation in a manner that marshaled considerable respect for the man on my part. They were; 1) to suppress rumors which might be true and consequently be disastrous, 2) refrain from any intentions of going "over the hill," as we are now on the alert, which makes such an offense "desertion," and 3) to join each with the other in making the squadron an efficient fighting unit. I was surprised that authentic statement of the fact that we are to leave very soon created so little comment among the men, but they all, like myself, have seen it coming for quite a long time. Really, it is what we are all anxious for.

MacFarlane, William V., Capt, pilot, Commander

Friday, October 2, we were not busy at the Armament tent so I decided to take a ride. Some of the pilots had to go to Colombia for their pay and so made that the object of their afternoon's flying. I rode in the upper gun turret, as I wanted to get some experience in operation of the guns. It was an excellent day for flying and there was scarcely a bump at all as we climbed to about a thousand feet elevation and headed northwest. An autumnal haze restricted vision for a very great distance, but I could see

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

clearly everything that passed below us. The countryside in this state is very irregular. Fields are all sizes and shapes, skirted by woods of varying color and density, through which narrow dirt roads seem to meander unintentionally. About the only symmetry to be seen is where a highway parallels a railroad for a few hundred yards before leaving it again to cross a stream or avoid a swamp.

In all there were three planes going to Colombia, but as there was an ominous blue smoke emitting from an oil leak in our left engine as it was warmed up, we were detained a few minutes to investigate. We lost no time getting on our way after take off and soon we were passing high above the Army primary training station at Orangeburg, where I counted twenty-five small yellow-winged Stearman biplanes landing and taking off on the small dirt field below. The next landmark was the wandering, sluggish, red Savannah River, which passes through Colombia. In another minute we were over the city with its mottled pattern of homes and factories, with the municipal airport and racetrack to the south and the rock quarry to the left and by the river. We circled the field once and landed. I immediately set off for the PX where I found some of the boys who had flown on the first two ships. We had some refreshments and I bought a Life magazine before going back to the plane. In an hour we were ready to return, and our plane was first to take the air. The others followed soon and from my place in the upper turret I watched them slowly take their places on our wing tips in the regular combat formation. Alternately I trained the turret guns on one ship and then the other as they bobbed up and down so close that I could see the expressions change on the faces of the crews. I was surprised to note the ease with which the target can be kept in the sight of the new, improved turret. Suddenly the pilot banked sharply to the right and I looked down to realize we were approaching our home base. So absorbed had I been in observing the flight of the other ships that I was completely unaware of how long we had been flying. With breathtaking unexpectedness our left wing tipped sharply upward and back to level flight. I suspected this was a sign of some sort so I watched to see what happened. Suddenly and as easily as if I had willed it, the plane on our left dipped downward and swung as if suspended by a string to a new position on the right of the rear plane. In another second we banked away from the other two and came in for a landing. As I walked back to the barracks I thought of man's wonderful abilities and his utter foolishness in the application of his knowledge."

446th Bombardment Squadron: No Entry

447th Bombardment Squadron: On September 18, 1942 the squadron moved by truck and plane to the base at Walterboro. It had been rumored that this base was in the middle of a swamp and that combat conditions would be simulated as nearly as possible during the second phase of training. One and all expected the worse. It was a pleasant surprise when it was found that heated stone barracks were available for the men and that in every respect the base was as good a location as Columbia. In many respects it was better.

Walterboro was a charming little southern city – clean and immaculate. Its people were friendly and many of the men from the squadron enjoyed the hospitality of their homes. There was one movie in the town and every show played to a capacity house, mostly soldiers, even though the pictures were usually very old. There were several restaurants in the town which served fairly good meals. The local high school granted permission for the squadron to use their gym for basketball games and practice.

When the group moved from Columbia to Walterboro Col. Robert Knapp assumed command, replacing Col. W. Mills, the first group commander. Col. Knapp had been the O.T.U. director at Columbia before assuming command of the group. Col. Mills was given command of the newly activated 340th Bomb. Group at Columbia.

Knapp, Robert Duane, Col, pilot, 321st BG Commander

Mills, William Courtney, Col, Commander

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

The second phase of O.T.U. training was started immediately at Walterboro and continued throughout October and November. The second phase consisted of more advanced combat training. Gunnery missions and practice bombing missions were run at Myrtle Beach daily to give the bombardiers and gunners training. Long range cross country flights were flown to give navigators and pilots practice in this type of flying. Practice missions were flown for which specific targets such as bridges, factories, etc. from two to three hundred miles away were selected giving the crews practice in finding a target and making a bombing run on it.

In October the flight echelon went to Eglin Field, Florida for special training in skip-bombing and torpedo-bombing tactics. They remained there two weeks for this training and then returned to Walterboro.

By the latter part of November the second phase of O.T.U. training had been completed and the squadron was technically ready for combat. The Group Commander, however, had been trying to persuade higher headquarters that the planes should be modified before going into combat and it was decided that these modifications would be made.

447th Bombardment Squadron Special Account: November 1, 1942: Lt. DeMoss had another narrow escape when he brought his ship in on two wheels – his right and nose wheels; his left wheel being stuck half-way down. Lt. DeMoss made a beautiful controlled landing on the left side of the runway. He kept the plane on its right wheel until the ship lost some of its speed and then the left wing settled into the sand to the left of the runway. The other slightly scared but uninjured occupants of the plane were Lts. Charles Hoffman and Stanley Lieberman.

DeMoss, Jack M., 2Lt, pilot

Hoffman, Charles W., 2Lt, pilot

Lieberman, Stanley (NMI), 2Lt, bombardier

447th BS War Diary: November 1942 *(prepared by 2Lt. McGlon T. Holloway, Transportation Officer)*

1 Nov The squadron had quite a scare today when Lt. DeMoss's plane made a crash landing. His hydraulic system failed and he was able to get only one wheel down and locked. He circled the field for about two hours trying to get the wheel down to no avail. Finally he made a successful crash landing and none of the crew was hurt.

DeMoss, Jack M., 2Lt, pilot

Day 2-28 Practice long-range bombing missions were run during this period. Combat operating procedures were followed as closely as possible. Crews were briefed before leaving and interrogated upon their return. The longest such mission was run to the Bahamas off the coast of Florida. Eleven of our planes took part in this -- the largest squadron practice mission flown during our training period. After flying over the Bahamas the planes landed at West Palm Beach for refueling and then returned to Walterboro the same afternoon.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

Day 29 After many false alarms the ground echelon left Walterboro today by train for the Army Air Base at DeRidder, La. The rumor is that we will take part for about ten days in maneuvers and then depart for our overseas destination. The flight echelon is to follow the ground echelon to DeRidder as soon as weather permits.

Day 30 Ground echelon enroute to DeRidder -- flight echelon remained at Walterboro because of bad weather.

448th Bombardment Squadron: At 08:45 on September 20, 1942, the 448th made its first move with a slightly clumsy manner which spoke of inexperience. The personnel packed their equipment and by airplane and motor convoy moved to the new base 90 miles away. The move passed without incident of note and the motor convoy arrived at Anderson Field, Walterboro, S.C. at 20:30 September 20, 1942.

At the new camp the squadron found itself permanent barracks, cots and new stoves, but due to a faulty plumbing arrangement very little water was to be had and what there was smelled extremely bad. The Mess Hall was a welcome relief after the tar paper shack of Columbia and immediate improvement was noted in the Bill of Fare.

The squadron was barely settled in its new home when word was received that the Flight Echelon would depart for a two weeks training program in torpedo bombing at Eglin Field, Florida. With the flying crews gone the Ground Echelon continued to set up the Line and Bivouac Area and indulge in a strenuous physical and Chemical Warfare program.

At Eglin Field on September 29 the squadron suffered its first casualty when while on a routine training flight 2nd Lieutenants: Crites and Woodworth T/Sgt. Fortenberry, S/Sgt. Calvo and Corporal StClair crashed into the water. Their deaths created much grief within the squadron.

448th BS A/C No. unknown

P *Crites, Ardith E., 2Lt*
CP *Woodworth, Leonard H., 2Lt*
N *None*
B
E *Fortenberry, Floyd H., T/Sgt*
R *Calvo, James W., S/Sgt*
G *StClair, Allen A., Cpl*
F *None*

A week later the Flight Echelon returned from Florida and with the squadron once more whole Lt. Bates ordered an intensifying of the physical training which was then in progress. From six o'clock Reveille to supper at 17:30 everyone was kept either working at their job or engaging in some sport or exercise.

Saturday, 1 August thru Monday, 30 November 1942 (continued)
Anderson Army Air Field, Walterboro, South Carolina (continued)

On October 14 everyone was happy to learn that Lt. Bates had been appointed Captain.

Bates, James P., Capt, pilot, Commander

As the squadron settled into its routine the personnel began to wander further a field and the town of Walterboro was a frequent rendezvous in which entertainment was sought but seldom found. With the exception of one small theater and a small Service Club there was little to attract the average soldier. On the field the plumbing improved and much larger PX was opened. One half of the squadron Mess Hall was converted to a Day Room and soon became a popular spot.

On October 16 the cry of fire was heard throughout the camp and piling into trucks with shovels and axes the men sped far back into the woods near the base to successfully combat a forest fire which threatened the entire region. Two days later a fire of unknown origin burned down one wing of the new hospital.

Operations continued to stress formation flying and bomb runs at Myrtle Beach. Cross country training flights soon became a common occurrence and 448th planes ranged far and wide over the country. By their skillful landings and takeoffs the pilots gave ample evidence that they were becoming well qualified to operate the B-25's in combat.

On October 31 the Line moved into its first permanent building. All Line Sections were housed in one building. As the weather grew cooler this was greatly appreciated. The squadron was also completely equipped and rumors flew to the effect that the Group was soon to move to its final staging area.

On November 12 Captain Clayton H. Heinlen was assigned and joined the squadron and assumed command. Captain Bates was transferred to headquarters 321st Bomb Group. Although everyone was sorry to see Captain Bates leave they all resolved to support the new Commander to the fullest extent.

Heinlen, Clayton H., Capt, pilot, Commander

As the month of November rolled along many men were given 5 and 7 day leaves for the purpose of completing any business preparatory to going overseas. Orders to move were expected almost any day.

Tuesday, 1 December 1942 thru Sunday, 20 January 1943
DeRidder Army Air Field, Louisiana:

HQ 321st BG War Diary: On November 29, 1942, the Ground Echelon left Walterboro, S.C., by rail for DeRidder Army Air Base, DeRidder, Louisiana, arriving on December 1, 1942. The Air Echelon joined the Ground Echelon on December 2, 1942. Just about everyone in DeRidder and the Air Base turned out to see the formations of Mitchell bombers come into the field. Maneuvers were held for all combat crews from December 4th to December 19th, 1942.

December 7, 1942, the anniversary of the attack on Pearl Harbor, found the 321st Bombardment Group in fighting trim and rapidly approaching the time when it should be ready to deal the enemy serious blows with a few secret weapons of its own.

In January, several of our officers were promoted to higher ranks; Major Olmsted was promoted to Lieut. Colonel, Lieuts. Gale and Lord, Adjutants of the 447th and 445th Squadrons, respectively, were displaying their new silver bars.

Gale, Myron, 1Lt, Adjutant, 447th BS Lord, Robert O. Jr., 1Lt, Adjutant, 445th BS
Olmsted, Charles T., Lt Col, pilot, Group Executive

The 321st Bombardment Group was getting its full complement of officers and enlisted men and completing the final stages of overseas training. The group was well-equipped with both men and materials. Misfits and overages were taken care of and suitable replacements made. Radar men were being assigned to the group and on January 1st and 2nd, planes, combat crews and some ground maintenance members flew to Macon, Georgia for armament modifications and rejoined the group shortly before it left DeRidder. An instance which will long be remembered at DeRidder Army Air Base was the wearing of the gas-mask for four hours. Those who failed to wear them will remember it even longer, as tear gas was sprayed about the entire base.

445th Bombardment Squadron: The entire Squadron moved into DeRidder on December 2, 1942. Except for those who left girls behind in Walterboro, there were many welcome changes in DeRidder. The food was good. There was a large moving picture theatre. There was a large gymnasium in which the men played basketball. There were the girls who worked in the Air Corps supply as well as those who worked behind the counter in the PX. The large trailer that conveyed men back and forth from the barracks to the line was an additional novelty.

The art of gas warfare was practiced with remarkable diligence. All the men at the base were required to wear their gas masks one day every week. From 15 minutes at first, the time was gradually increased until one full hour was reached. Some of the boys experienced a spell of bladder trouble during the middle of these tests and remained in the latrine for an unusual length of time. One week one of the gas warfare men, led by an exceptional zeal for his work, sprayed gas inside of barracks, and other buildings and even into men's faces who were not wearing gas masks. The results were so bad that the men were unable to sleep in their barracks at night time. The men heard with considerable satisfaction the enthusiastic gas man was courts-martialed or otherwise disciplined for his lack of discretion.

Tuesday, 1 December 1942 thru Sunday, 20 January 1943 (continued)
DeRidder Army Air Field, Louisiana (continued)

Two barracks directly across from the Officer's Club were assigned to the 445th. These buildings were rapidly converted into active poker clubs, especially on payday and for a short time thereafter.

One day, Lt. McEnroe quite unintentionally tested the capabilities of the jeep to the uttermost. He drove into a ditch and it required a 2½ ton truck to extricate it.

McEnroe, Henry A., 2Lt, bombardier

There was the never-to-be-forgotten episode created by Lt. Rudolph. One evening he became a little careless by reason of some liquid refreshment. In his mood of abandonment, he reverted to his former pugilistic days and drove his fist through several places in the fabric that served as partitions in the Officer's barracks. The matter was reported by the base Officer in charge of the buildings and all the Officers were called together in the orderly room and reprimanded by Colonel Knapp. There was serious debate as to whether Lt. Rudolph should be relieved of his first pilot's rating. All of the Officers were ordered out of their barracks and into barracks in the enlisted men's area. They were required to carry their own belongings in their hands and were forcefully discouraged from using any kind of vehicle for the job. Captain Smith, the Squadron doctor, and the highest ranking officer in the barracks, took over the job of making the Officers at some very early hour before it was light. The officers felt pretty much as if they were a segregated bunch of undesirables. One night in these same barracks the ground Officers were given tests to see if they could make the grade of flying. They walked rapidly around a broom handle held against the ceiling with their eyes fixed on the end of the broomstick. After about 12 times around, the task was to walk straight ahead and pick up a cigarette lighter without falling over. The writer knows from experience that the floor seemed to come up in all directions and move around like big waves in a stormy sea.

Knapp, Robert Duane, Col, pilot, 321st BG Commander

Rudolph, Raymond L. "Rudy", 2Lt, pilot

Smith, William C. "Doc", Capt, Flight Surgeon

It should be observed at this point that Lt. Rudolph weathered the storm and later over in the combat theatre, received the Distinguished Flying Cross and left for the United States with the affection of all the men in the Squadron.

Rudolph, Raymond L. "Rudy", 2Lt, pilot

A short time after the arrival at DeRidder, the Group participated in maneuvers which had been planned. Its assignment was to give close-in support for the ground forces. So far as the 445th Squadron was concerned, more practice was received in getting the planes off the ground in a minimum time than anything else. The weather was unfavorable during the maneuvers and the number of missions flown were not as large as expected. Small bags of flour were used for bombs. The targets were assigned by the ground forces and came through by code template references. After the maneuvers were over, the ground forces sent congratulations to the Group for the part it played in the maneuvers.

Tuesday, 1 December 1942 thru Sunday, 20 January 1943 (continued)
DeRidder Army Air Field, Louisiana (continued)

DeRidder went dry on December 31, at least it was supposed, according to the law, to go dry. The men disapproved.

445th BS: *War Diary of: Seegmiller, Barnard H., Sgt, armament:*

01/17/43: "This evening I attended the Chaplain's service, which is held regularly each Sunday night. In the several months I have known him, I have grown to have a deep respect for Chaplain Johnson. Always I get something worthwhile from his talks, which he delivers in a very quiet, logical, informal, and direct manner. I am glad that I have learned that I can get something of a spiritual lift from our GI services, for at first, when to myself, I criticized Chaplain Johnson, I used it as an excuse to let Sunday pass without being distinguished from other days. The type of "old time religion" he believes and occasionally preaches seems in many ways, shallow, but it has done an unimpeachable job of saving him so far as a righteous life is concerned."

Johnson, E. V. (i.o.), 1Lt, Chaplain

446th Bombardment Squadron: No Entry

447th Bombardment Squadron: While waiting for the modifications the Group was to go to DeRidder, Louisiana and participate in maneuvers with our group giving ground support. The ground echelon left Walterboro on November 29, 1942 by train. They arrived in DeRidder on December 1, 1942. The flight echelon followed and they arrived in DeRidder December 2, 1942.

Accommodations at DeRidder were about on a par with those at Walterboro. The flight line was nearer the squadron area, however, and the line sections were in buildings instead of tents. There was a movie on the base at DeRidder. There had been none on the two previous bases at which the squadron was located. A new Officers Club had just been opened on the base and it was a nice one. There was a bar, a large dance floor, a lounge, and a dining room.

The city of DeRidder was rather dirty compared with Walterboro. There were two movies in town but few restaurants where decent meals were served. Soldiers from nearby Camp Polk plus those from the Air Base heavily taxed the city's facilities.

The maneuvers got under way soon after the squadron's arrival at DeRidder. They lasted for about two weeks. After participating in these exercises there was little for the squadron to do except wait until the planes could be modified. These modifications were to be made in Mobile, Alabama and Macon, Georgia as soon as the facilities for making them were available at these places.

A few bombing and gunnery missions were run while the squadron waited and a few cross country flights flown. About January 1, 1943 the first squadron planes left for Mobile, Ala. Modifications in the radios were made there. Then the planes went to Macon, Ga. And there modification in armament were made. The lower turrets were removed and tail and waist guns put in. Also armor plating was put in to protect the positions of each crew member. These modifications made the B-25's a much safer and much more effective combat airplane.

Tuesday, 1 December 1942 thru Sunday, 20 January 1943 (continued)
DeRidder Army Air Field, Louisiana (continued)

The Air Echelon of the Squadron was activated at DeRidder Army Air Base, Louisiana on January 21, 1943 when the Ground Echelon entrained for its Staging Area at Camp Kilmer, New Jersey. The Air Echelon was composed of forty-five officers and fifty-one enlisted men with Captain Sampson Commanding, Lt. Manly, Adjutant, and Capt. Bell, Operations Officer. The period until its departure was spent in modifying the planes and preparing them for combat. The greater part of these modifications were made at the Mobile and Macon Air Depots. There was very little practice flying, bombing or gunnery.

*Bell, Albert R., Maj, pilot, Operations Officer Manly, Robert W. "Horse", 2Lt, Adjutant
Sampson, Raymond D., Capt, pilot, Commander*

447th Bombardment Squadron Special Account: December 19, 1942: The enlisted men had a pre-Christmas party at the spacious U.S.O. Club at DeRidder, Louisiana. The dance was well attended and the U.S.O. hostesses took over to the strains of a local 4-piece orchestra which wasn't bad – for DeRidder. Refreshments were served.

447th Bombardment Squadron Special Account: December 31, 1942: The officers took part in a gala New Year's party being held at the Officers Club, DeRidder Army Air Base. Noisemakers, confetti, streamers, and music by a 10-piece Camp Polk band filled the air until the wee small hours of the Morning. The female civilian employees of the Air Base Supply Depot were well represented, coming as dates of many of our officers who seemed to get the cream of the crop. Lt. Gale, our Adjutant, and former Russ Morgan bandster created a minor sensation with his renditions of the best in popular music on the saxophone, clarinet. That was the last party before leaving for overseas duty.

Gale, Myron (NMI), 2Lt, Adjutant

447th BS War Diary: December 1942 *(prepared by 2Lt. McGlon T. Holloway, Transportation Officer)*

Day 1 Ground echelon arrived at our new base. It is rather wet and muddy but the base isn't bad. A new officers club has just been opened on the base and provides excellent facilities for diversion. There is a bar, a dance floor and a lounge as well as a dining room. There is a movie on the base too which is something we haven't had at either of our two previous bases. The men are quartered in wooden barracks and there are buildings on the line for the various sections.

Day 2 The flight echelon arrived at DeRidder today. All the planes made the trip safely. The flight personnel spent the afternoon moving into the barracks and getting settled.

Day 3-16 During this period we participated in maneuvers. A certain number of crews were put on the alert each day. The exercises were C.P and our targets pin points on the map. We were given small paper bags of flour which were to be used as bombs. One of the objects of the exercise was to see how quickly we could get the planes in the air after receiving orders. The pin point targets were called into the squadron S-2 section.

Tuesday, 1 December 1942 thru Sunday, 20 January 1943 (continued)
DeRidder Army Air Field, Louisiana (continued)

Planes and crews were all kept ready to go and took off immediately after being given a map with the target marked on it. This was practice in ground support work and the bombing was done from very low altitudes. Those in command of the maneuvers were well pleased with the manner in which we carried out our part of the exercises.

Day 16-31 Training continued during this period. Gunnery missions were flown daily when the weather permitted. On one of these gunnery missions one of our planes got a .50 ca. bullet through the bomb bay. On another, a bullet went through the plexiglass dome above the navigator's compartment in one of our planes. Ricochets are believed to be responsible for these two hits. No one was hurt.

447th BS War Diary: January 1943 *(prepared by 2Lt. McGlon T. Holloway, Transportation Officer)*

Day 1-20 During this period our planes were flown to Mobile, Ala. For radio modifications. They were then flown to Macon, Ga. For armament modifications. At Macon the lower turret was removed, waist and tail guns installed and additional armor plating added for all crew positions in the planes. These modifications make the plane a much more formidable combat weapon.

Day 21 The ground echelon boarded a train today for Camp Kilmer, N.J. This is to be our final staging area before embarking for our overseas destination. The flight echelon remained at DeRidder and the two echelons will be separated until both are overseas. Members of the flight echelon came to the train to see the ground echelon off and good-byes were said by all.

448th Bombardment Squadron: On November 29th the long awaited move took place, a few days prior while everyone was busily engaged in a gargantuan Thanksgiving Day feast the Orders were issued to prepare for the move. Immediately everything and everyone were concentrated on the effort of assembling and packing the equipment. The loading of the freight and motor vehicles on railroad cars consumed two days and on the above mentioned date at 13:30 the Ground Echelon left Anderson Field, Walterboro for DeRidder Army Air Base.

The accommodations for the squadron were very poor on this move. The men were entrained on old and dilapidated coaches without sleeping accommodations for their three day journey. The cooks did a very creditable job on this first trip in which field stoves were used. Captain Haven, the train Commander, complimented the men on their orderly conduct throughout the journey despite the hardships and discomfort of their accommodations. The Ground Echelon arrived at DeRidder Army Air Base at 08:30 December 1, 1942, and immediately detrained.

Haven, Malcolm D., Capt, intelligence

Tuesday, 1 December 1942 thru Sunday, 20 January 1943 (continued)
DeRidder Army Air Field, Louisiana (continued)

The new base offered the most complete facilities in the way of Mess, Barracks and recreational facilities. The Ground Echelon began immediate work setting up the squadron area and the Line. As bad weather had prevented takeoff, the Flight Echelon did not arrive until two days later. They found the organization prepared to receive them.

The Squadron found itself in a happy situation. The Mess for the first time had real plates, fed Garrison Rations and did not discourage seconds. In the barracks gas heaters and double deck cots assured everyone of a comfortable rest. Hot showers were available at all hours. The base was well paved and had adequate PX's, a well equipped gymnasium and a new theater. Although the town of DeRidder had little to offer, the facilities on the base more than made up the deficiency.

The Officer's Quarters consisted of Barracks on the far side of the base and in conjunction with the Officer's Club were considered very adequate by all who lived there.

Immediately after arrival 1st Sergeant Asch and several other men were transferred to O.C.S., Miami Beach, Florida, everyone wished them good luck and wished them on their way. The squadron engaged in an intensive physical training program while carrying on maneuvers and simulated bombing in conjunction with "Louisiana Maneuvers". Each morning found combat crews on the alert awaiting orders that sent them hurrying to their planes for take off to bomb the mock enemy. A few cross-countries and much formation flying was the Order of the Day.

Asch, Murray (NMI), S/Sgt, 1st Sgt, 448th BS

In the Squadron Area Lt. Jantz and his supply sergeant made preparations for the contemplated move over seas, all sections were rendering reports to Lt. Jantz as to the bulk and weight of their equipment. Crating and marking boxes became a standard procedure during the early weeks in December.

Jantz, Lawrence E., 2Lt, supply

Meanwhile the squadron was enjoying dances, beer parties and basketball games as it awaited Orders to move. Christmas passes with little excitement except for a delicious meal served at the Mess Hall. Liquid refreshment was the keynote of the New Year's celebration.

1943 was ushered in with earnest efforts being made by everyone to prepare for the long heralded move overseas. New men and officers were brought into the squadron to fill vacancies and all equipment was put in first class condition for this event. While planes were shuttled between the modification centers and the air base the combat crews were given a critique of the maneuvers and more practice in combat flying. Everything was ready for the move over seas and the squadron morale was exceedingly high in anticipation of the move.

Thursday, 21 January 1943

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force): In Libya, B-24s bomb Tripoli harbor while B-25s attack targets along the Surman-Az Zawiyah road. P-40s fly fighter-bomber missions against ground targets as the British Eighth Army overcomes resistance in the area. The enemy strengthens the Tarhunah area at the expense of the Homs front, causing General Montgomery to decide to make the main effort along the coast.

WESTERN MEDITERRANEAN (Northwest African Air Force): In the Mediterranean, six B-26s of the 319th Bombardment Group (Medium) hit two freighters northeast of Cape Bon, sinking one and damaging the other. The escorting P-38s shoot down two Z 1007 bombers and then mix it up with six Bf 109s, claiming three shot down but losing two P-38s. **In Tunisia,** B-25s bomb the highway and railroad bridge just north of Pont-du-Fahs. Fighters fly bomber and C-47 escort and fly sweeps and reconnaissance, attacking and destroying a large number of trucks on the Gabes-Ben Gardane road. A-20s and fighter escort bomb and strafe a tank and truck concentration near Ousseltia in support of elements of the US 1st Armored Division which begins the Allied assault in an effort to push the enemy back in the Ousseltia Valley into which a new enemy offensive under new German Commanding General, Colonel General von Arnim, has advanced in a four-day push. 24 P-38s find the Gabes-Medenine-Ben Gardane road crowded with traffic; they swept down and strafe, claiming 65 vehicles destroyed plus two Bf 109s destroyed in the air. A detachment of the 154th Observation Squadron, 68th Observation Group with P-39s begins operating from Youks-les-Bains, Algeria. The squadron will fly its first combat mission as a tactical reconnaissance unit on 26 Jan.

Camp Kilmer, New Jersey

HQ 321st BG War Diary: On January 21, 1943, the Ground Echelon left DeRidder and entrained for Camp Kilmer, New Jersey and arrived on January 24, 1943. The trip was pleasant, as they rode on Tourist Pullmans and Pullmans. The group was highly commended at Camp Kilmer for the splendid way in which we had been equipped. We were told that no other group had arrived at the staging area so completely equipped and ready for embarkation overseas.

445th BS War Diary: From January 1, 1943 on, the main topic for rumors was the time for leaving for some combat zone overseas. Eventually the day arrived. On January 21 the ground echelon pulled out on a train headed for Camp Kilmer, New Brunswick, New Jersey. However, it was not till February 12 that the air echelon left for Morrison Field, the port of embarkation. Shortly after takeoff we were advised that the formation would land at Homestead. However, when we arrived at Homestead we were then directed to proceed to Morrison Field.

446th BS War Diary: No Entry

Thursday, 21 January 1943 (continued)

447th BS War Diary: The modifications having been made the group was now ready to go into combat. The ground echelon was the first to leave DeRidder. On January 21, 1943 they boarded a train for Camp Kilmer, New Jersey. Camp Kilmer was to be the final staging area.

The camp was covered with a blanket of snow when the ground echelon arrived. Some of the men in the squadron had never seen snow and this was a very interesting sight to them.

All the men were restricted to the base at Camp Kilmer. Telephone calls were not permitted. Letters could be written but from the day the squadron reached camp Kilmer all the mail was censored. The enlisted men's mail was censored by squadron censors, the officers' mail by base censors.

There were several movies on the base at Camp Kilmer. Most of the men in the squadron went to one of these almost every day. All the men stocked up on supplies at the Post Exchange. Inspections of equipment, records, and personnel were conducted during the time the squadron remained at Camp Kilmer. The final inspection was a physical examination by a medical officer and a dental officer.

448th BS War Diary: At 18:45, January 21, 1943, the Ground Echelon under the command of Lt. Kneivel bid adieu to the Flight Echelon and boarded the train bound for their staging area. Neither echelon knew when, where, or how they would meet again. Many in fact were dubious about such a meeting ever taking place.

Kneivel, Arthur W., 2Lt, executive

First the narrative of the experiences of the Ground Echelon (4829E) will be told and then that of the Flight Echelon.

The train that departed the DeRidder Army Air Base was by far the most Luxurious accommodation the 448th had ever experienced. Two Pullmans for the Officers and seven for the Enlisted Men with a kitchen car between made up the train. After a slow start in which they went through numerous switch stops the train finally began its northerly trek. The Officers and Enlisted Men settled down to enjoy a much needed rest after the hectic days of packing and departure. All were quiet for a time. The realization had come to all that at long last after many false starts they were on their way over-seas. They thought wistfully of motion picture scenes of this event. But for them there were no cheering throngs, no loved ones waving their last good-bye. Just a few busy train-men waving a casual salute was the send off.

However this mood did not last, soon the sound of signing, card playing and the usual troop-train noises resounded throughout the cars. Major Lowell was later complimented on the good behavior of the troops while aboard.

Lowell, William A., May, Adjutant, HQ 321st BG

In the kitchen car the cooks were busily preparing supper and soon after the departure "Chow Call" was sounded. An excellent meal was served which was the fore-runner of the many delicious repasts yet to come.

So past three monotonous but restful days as the train continued northward and then abruptly, at St. Louis, eastward. Rumors as to its destination ran rampant throughout the train but none knew for sure and the train had rations for seven days aboard.

Thursday, 21 January 1943 (continued)

Finally after passing Harrisburg many men came to the agreement that a new camp at New Brunswick, N.J. was the destination. At 09:00 on January 23, 1943, the Ground Echelon arrived at Camp Kilmer, their staging area for over-seas movement. They were greeted by snow and freezing weather, the first ever experienced in their training.

Camp Kilmer meant rest and relaxation for most of the men but for Lt. Kneivel and his Orderly Room staff and Lt. Jantz and his Supply men it meant long hours checking records and exchanging clothing to insure everyone of being completely supplied for over-seas duty. The squadron Messed in consolidated Mess Hall and after standing in line for hours in the cold and then receiving the food that was served to everyone, all were willing to admit the superiority of their own cooks.

Jantz, Lawrence E., 2Lt, supply

Knievel, Arthur W., 2Lt, executive

The whole Group was restricted to the Post, due to error. Many men who had lived in the vicinity were sadly disappointed in that they were not allowed to visit their homes for the last time. No communications of any kind were allowed although it seemed a real hardship at the time; everyone realized that it was a necessary security measure. For the first time the Squadron's mail was censored. The usual comments were made concerning censors and censorship.

Steam heat, hot showers and fairly comfortable barracks were available and the added attraction of snow fights, post theaters and PX's not to mention the Post Library compensated to some extent for the restrictions.

Friday, 22 January 1943

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force):

In Libya, B-25s bomb a road junction near Tripoli. P-40s fly cover and fighter-bomber missions as the British Eighth Army's 22 Armored Brigade passes through 51 Infantry Division at Homs and drives beyond Castelverde. Forces to the south advance to within 17 miles of Tripoli.

WESTERN MEDITERRANEAN (Northwest African Air Force): Another step is taken toward amalgamation of US and RAF air strength in the Allied Air Force. Air support for US and British ground forces in North Africa is coordinated by the formation of a new combined HQ, Allied Air Support Command, subordinate to the Allied Air Force and under the command of Major General Laurence S Kuter, USAAF. The new command consists of the USAAF XII Air Support Command, the RAF No. 242 Group, a photographic reconnaissance unit and any other units that might be assigned to it.

In Tunisia, B-17s, operating in two forces, bomb El Aouina Airfield in the morning; B-26s hit the airfield shortly after noon; and B-25s attack later in the afternoon. Two escorting P-38s are lost to enemy fighters. Fighters fly escort for bombers and for C-47s and carry out numerous reconnaissance and patrol missions. P-39s and P-40s support the Allied ground assault in the Ousseltia Valley which has been halted to by strong opposition; the fighters silence several machinegun positions. One P-40 is lost.

In the Mediterranean, other B-26s, on a shipping strike, severely damage a freighter in the Straits of Sicily. HQ 81st Fighter Group transfers from Mediouna, French Morocco to Thelepte, Tunisia.

Saturday, 23 January 1943

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force):

In Sicily, B-24s bomb Palermo harbor during the night of 23/24 Jan.

In Libya, P-40s fly cover and fighter-bomber missions during the day as Tripoli falls to General Montgomery's Eighth Army.

WESTERN MEDITERRANEAN (Northwest African Air Force):

In Tunisia, B-17s, in two forces, hit the Bizerte naval base and shipping in the immediate area. Much damage is done to base facilities and one motor vessel is sunk; 75 to 100 enemy fighters attack the formations, and the B-17s and escorting P-38s claim 20 destroyed; two P-38s are lost and four more are missing. A-20s, and escorting P-40s, attack a heavy gun battery, machinegun nests, and two infantry companies while supporting ground forces in the battle area south of Ousseltia. Fighters of the XII Air Support Command destroy over 20 vehicles on the Gabes-Ben Gardane highway.

In the Mediterranean, B-26s hit shipping off northeastern Tunisia, attacking several vessels and claiming one destroyed; escorting fighters hit trucks and tanks near Enfidaville, Tunisia on the return flight. The 91st Fighter Squadron, 81st Fighter Group with P-39s transfers from Mediouna, French Morocco to Thelepte, Tunisia.

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force):

In Tunisia, B-24s strike Medenine Airfield while P-40s fly cover and fighter-bomber missions as Axis forces retreat westward from Tripoli. The 84th, 85th and 86th Fighter Squadrons, 79th Fighter Group with P-40s transfers from Egypt to Libya.

WESTERN MEDITERRANEAN (Northwest African Air Force):

In Tunisia, B-25s and B-26s, operating in two forces, attack Medenine Airfield; B-17s hit shipping in Sousse harbor; fighters escort bombers and attack vehicles and troop concentrations along the battleline.

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force):

In Libya, P-40s carry out fighter-bomber missions. The British 7 Armored Division, in pursuit of the enemy, reaches Az Zawiyah. HQ 79th Fighter Group transfers from Egypt to Libya. The 345th Bombardment Squadron (Heavy), 98th Bombardment Group (Heavy) with B-24s transfers from Fayid, Egypt to Tobruk, Libya.

WESTERN MEDITERRANEAN (Northwest African Air Force):

In Tunisia, bad weather cancels heavy and medium bomber missions. Fighters fly reconnaissance, patrol and C-47 escort missions.

447th BS War Diary: 25 Jan - 6 Feb During this period everyone was restricted to the base at Camp Kilmer. No telephone calls were permitted. Inspections of equipment and personnel were conducted. The squadron was highly commended on the completeness of its equipment. New equipment was issued to replace any that was short or worn out. There were several movies on the base and an officers club and NCO club for diversion. A brief physical examination was our last official inspection at Camp Kilmer.

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force):

In Italy, headwinds prevent B-24s from reaching Naples, the primary target, before dark, so they divert to Messina, bombing the town and the area around the train ferry terminal.

In Libya, P-40s fly fighter-bomber operations, refueling at Castel Benito. The 415th Bombardment Squadron (Heavy), 98th Bombardment Group (Heavy) with B-24s transfers from Fayid, Egypt to Tobruk, Libya.

WESTERN MEDITERRANEAN (Northwest African Air Force):

In the Mediterranean, B-26s on a shipping strike abort because of weather that limits air activity.

In Tunisia, fighters fly reconnaissance and local patrol missions.

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force):

In Italy, B-24s bomb Naples and Messina during the night of 26/27 Jan.

In Sicily, B-24s hit Palermo during the afternoon, after weather causes a diversion from the primary target at Naples.

In Libya, the British 7 Armored Division meets stiffening resistance near Zuwarah.

WESTERN MEDITERRANEAN (Northwest African Air Force):

In the Mediterranean, B-25s hit shipping off the north coast of Algeria, attacking two destroyers and leaving one on fire. B-26s on a shipping strike fail to attack sighted vessels because of weather.

In Tunisia, A-20s attack the town of Al Mazzunah while fighters escort bombers and fly reconnaissance and local patrols.

01/30/43: "A few days ago I received a letter from Griffiths who is in North Africa. He included the following lines of verse by his father, which I requested of him:

Let us quit the strife for the simple life

And pass quietly on to our fate.

For the ultimate goal is the peace of the soul

Not a stack of the pieces of eight.

Some day I am going to try to figure out why some personalities blend so easily and perfectly into lasting friendships."

Sunday, 31 January 1943

USAAF Chronology: MEDITERRANEAN THEATER OF OPERATIONS (MTO):

EASTERN MEDITERRANEAN (Ninth Air Force): Lieutenant General Lewis H Brereton, Commanding General Ninth Air Force assumes command of US Army Forces in the Middle East.

In Italy, B-24s hit the railroad ferry installations at Messina harbor. The British 7 Armored Division finishes clearing Zuwarah. HQ IX Fighter Command arrives at Kabrit, Egypt from the US. The 343rd Bombardment Squadron (Heavy), 98th Bombardment Group (Heavy) with B-24s transfers from Kabrit, Egypt to Gambut, Libya.

WESTERN MEDITERRANEAN (Northwest African Air Force):

In Tunisia, B-17s hit the harbor and shipping at Bizerte while B-26s bomb Gabes Airfield. Fighters escort bombers and attack ground targets and furnish cover for ground forces along the battleline between Gafsa and Faid. With the conclusion of the Casablanca Conference, the 308th Fighter Squadron, 31st Fighter Group, which has been operating its Spitfire Mk Vs from Casablanca, returns to its base at Tafaraoui, Algeria.
