DATE	EVENTS
27	Five men left this morning (advance party) for Pompei Airfield, remainder of Squadron busy preparing for the move. A strong wind blowing with rain, sleet and snow didn't do much good for anyone's morale.
28	Squadron personnel, with exception of flight echelon, left Foggia #3 at 0900 hours and arrived at Pompei Airfield (distance approximately 90 miles) at 1730 hours. The usual confusion of unloading at a new bivouac was shattered by a terrific explosion nearby (blasting an obstruction at the end of the runway). Everyone was a bit startled but the fur-line molasses jug went to a tall, colored truck driver from the Service Group who, with a nod toward nearby Mt. Vesuvius, nonchalantly explained "Ah didn't pay no attention to it; Ah just thought it was that volcano acting up again."
29	to
30	Squadron area is a half mile stretch of the road between Terzingno and Foggia-Marino and these days were spent in assignment and moving into the small, cold and dark Itie houses in that area.
31	T/Sgt Wiechman and S/Sgt Fox received their order assigning them to Personnel Center #1 for trans-shipment to USA and departed this Squadron same day. They completed their combat tour some weeks ago and were eager beavers to be gone.

Blaney had been killed when his plane crashed on the north cape of Sicily, due to engine failure. The remainder of the crew: Lt. Snow, Lt. Click, T/Sgt Anderson, and Sgt R.C. Brown bailed out and escaped with only minor injuries. It appears clearly that Lt. Blaney, the Pilot, sacrificed his life that his crew might survive. After the other crew members had bailed out, Lt. Blaney succeeded in getting clear of the plane but too late to save his own life. Funeral rites for Lt. Blaney are to be conducted at 1330 hours with burial in the American Military Cemetery near Gela, Sicily, 9/13/43.
